Product Specifications

Improve the grip for bits in our rotary tool line with a genuine Dremel collet set. With the 480, 481, 482, 483 collets, plus a quick-change collet nut, you can easily use a wide range of bits. Five piece set.

- Provides the optimal grip for bits offered for our rotary tool line
- The collet features small identification rings around its shank
- These rings correspond with the size of the collet: 0 rings = 1/8", 3 rings = 3/32", 2 rings = 1/16", 1 ring = 1/32"
- For use with all rotary tools except discontinued models 1, 2, and series 1 or earlier of discontinued models 260, 270 and 280
- Individual collets are compatible with flex-shaft tool hand-pieces #235 and #237
