

Description

BQ108 - B.K. AIRPORT GRADE DEPRESSION FILLER combines a rugged, asphalt blend of special liquids and adhesives with crushed and carefully graded aggregates to create an interlocking patch that binds to any firm surface. This unique product is designed to repair depressions, cracks and expansion joints in asphalt surfaces.

Features:

- Fast drying
- Binds to any firm surface
- Leaves a clean black finish

Coverage

10 kg (22 lb) will cover 1.12 sq. m x 6 mm (12 sq. ft. x 1/4") before compacting.

Surface Preparation

Sweep the area free of dirt, dust and debris. Scrub ground-in dirt with **Black Knight Airport Grade Multi-Purpose Cleaner**. Prime the area with **Depression Filler Primer** (included inside the pail). On rough surfaces, the primer should be scrubbed into the damaged area with a stiff brush to wet the entire surface. The primer should become tacky before **Depression Filler** is applied.

Application

Application Temperature: Apply at temperatures above 10°C (50°F).

Repairing Depressions: Apply **Depression Filler** in 6 mm to 12 mm (1/4" to 1/2") thickness and tamp or drive over patch several times to fully compact. You cannot over compact. If patch seems soft, it needs more compaction.

Depression Filler allows immediate foot and car traffic with no drying time.

Repairing Cracks and Expansion Joints: Remove dust, dirt and debris by sweeping out the damaged area. Brush the Primer into the damaged area ensuring the entire surface has been primed. Compact **Depression Filler** in 5 cm (2") increments. **Depression Filler** should be leveled and ready for use after heavy compression. **Depression Filler** can be sealed after 90 days.

Cleanup

Easy clean-up with soap and water or mineral spirits.
